

Ornamental Plug Plants

What are Ornamental Plug Plants?

These are seed raised bedding plants that are grown in a tray with 20 individual plug cells, within each of which there is one plant. Each plug plant measures 5-7cm in height, when measured from the base of the root to the top of the plant, and has a compost plug root ball of 2cm in height.

Our Plug Plants can be grown on in pots or planted straight out into the garden, once the danger of frost has passed.

Our plug plants are only £4.65 for a tray of 20 plants. Due to the packaging they are sold in multiples of 3 trays, but you can mix and match your varieties. Other companies require you to buy 60 plants of the same variety, but we let you choose 3 different varieties giving you better overall value and flexibility in your choice.

We use the Royal Mail to send deliveries so unlike other companies we don't charge extra for delivery to Northern Ireland, Guernsey, Jersey, Isle of Man or other UK islands. Our P&P charge is only £5.99.

Wonder Plants - Quality Plants at Sensible Prices!

Aftercare Instructions

Push the plug of compost from underneath to extract the plants from their wrappings, and then pot them on into 3" (7.5cm) pots, in bedding plant compost or plant out directly. Water as required, feed once a week and protect from frost.

Our Superb Range of Ornamental Plug Plants
